

OWL class Homework Projects Summer term 2024

Alongside the regular reading homework, we have some exciting projects for Owl Class to explore at home.

1. Share your favourite place.

In RE, we are learning about special places, please share your favourite place. Be as creative as you wish! Perhaps you would like to paint, draw or build.

2. Become a wildlife detective and go on a minibeast hunt.

Make a list of all the minibeasts which you see on your hunt, perhaps you would like to draw and label some of the minibeasts. If you are unsure of the names of the insect, please ask an adult to help you find out either in an information book or on the internet.

3. Explore measuring weight.

Follow a recipe with an adult to make a tasty treat. Can you help to weigh the different ingredients? Talk about how the scales change as you add more.

You are invited to do project 1, 2 3 or all of them! Please save your completed project work to share with your friends and families at an open afternoon on Wednesday 12th June.

If you wish to take photos of your ongoing projects, please do so, we will be delighted to share them!
